PROFESSIONAL SUMMARY

Backend-focused Software Engineering student with hands-on experience building production-grade REST APIs using Spring Boot, JWT authentication, and MySQL. Proficient in layered architecture (Controller–Service–Repository), RBAC, CORS configuration, and cloud deployment on Render/Vercel. Additional expertise in AI engineering — LLM-powered applications, RAG pipelines, FastAPI, and multi-agent systems. Seeking a Software Engineering internship to build scalable backend systems.

TECHNICAL SKILLS

- Languages:** Java, Python, SQL
- Backend:** Spring Boot, Spring MVC, REST API Design, JWT Authentication, RBAC, BCrypt, Spring Security, JPA, Hibernate, Maven, FastAPI
- Databases:** MySQL, MongoDB
- AI / LLM:** LLMs, RAG, Prompt Engineering, AI Agents, LangGraph, MCP, Groq API, Structured Outputs, LLM Evaluation
- Tools & DevOps:** Git, GitHub, Postman, IntelliJ IDEA, Render, Vercel, VS Code
- CS Fundamentals:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

WORK EXPERIENCE

Associate Junior Developer Intern — DigiCoders Technologies Pvt. Ltd., Lucknow Jun 2025 – Sep 2025

- Built and maintained web applications using Java, JSP, JDBC, and MySQL — handling backend logic, frontend integration, and end-to-end feature testing.
- Performed API validation with Postman and debugging across multiple production modules; contributed to all stages of the development lifecycle.

PROJECTS

SamarthSetu — Memory & Reminiscence Support App (SIH 2026)

- Tech:** Spring Boot, MySQL, JPA/Hibernate, JWT, BCrypt, Spring Security, React, Render, Vercel
- Architected the full backend for a healthcare app (elderly users + caregivers) using layered REST API design (Controller → Service → Repository → MySQL).
 - Implemented JWT authentication and RBAC with BCrypt hashing, securing distinct USER and CAREGIVER flows; configured CORS for a Vercel-deployed React frontend.
 - Designed relational schema for users, memories, and reminders; integrated AI-generated content storage for an LLM-based memory analysis pipeline.

Hospital Management System

- Tech:** Spring Boot, MySQL, Spring Security, JPA/Hibernate, REST APIs
- Building patient registration, appointment scheduling, and doctor management modules with role-based access (Admin, Doctor, Patient) using Spring Security.

AI Resume Evaluator

- Tech:** Python, FastAPI, Groq API, Pydantic, PyPDF, python-docx
- Built an AI evaluator that parses PDF/DOCX resumes, extracts structured candidate data using LLMs and Pydantic schemas, and scores job-fit automatically.

AI Resume Chatbot | ayush-ai-chatbot.vercel.app

- Tech:** Python, FastAPI, Groq API, Pydantic, HTML/CSS/JS
- Built a live AI chatbot representing the candidate — LLM-powered FastAPI backend with resume injected as RAG context; fully deployed on Vercel.

EDUCATION

B.Tech in Computer Science Engineering (3rd Year) — REC, Basti (AKTU) 2023 – 2027

Diploma in Computer Science Engineering — Board of Technical Education, UP 2020 – 2023

ACHIEVEMENTS

- Smart India Hackathon (SIH) 2026 — Selected at college level; building SamarthSetu, a production-grade healthcare backend with JWT auth, MySQL, and cloud deployment.
- Active open-source contributor on GitHub — projects spanning Spring Boot REST APIs, AI tooling, and LLM integrations.
